OUR INSPIRATION

Our Respected Management

Dr. Subir Kumar Banerjee
Founder Trustee

Mrs. Suvra Banerjee
Founder Trustee

Mrs. Gauri B. Bhattacharya
President

Dr. Rituparna Banerjee
Secretary

Mr. Sreejit Bhattacharya
Treasurer

Our school's journey of excellence is a reflection of the collective vision, dedication, and unwavering commitment of many pillars who work tirelessly behind the scenes.

We extend our deepest appreciation to our esteemed Management for their visionary leadership, constant encouragement, and steadfast support. Your commitment to nurturing an environment of growth, innovation, and integrity continues to inspire every member of our institution. The strong foundation you provide empowers us to strive for excellence each day.

ACADEMIC CONSULTANTS- MISSION TO EXCEL

Ms. Sujata Agarwal
Sr. Academic Consultant
NHGS

Ms. Suma Nidoni
Academic Head,
NHGS

Ms. Jyoti Yadav
Sr. Academic Consultant
Foundational Years, NHGS

Team of Academic Consultants

A special word of thanks to our dedicated team of Academic Consultants, whose expertise, guidance, and insightful mentorship have been instrumental in elevating our academic standards. Your thoughtful strategies and continuous support ensure that both educators and students are equipped to achieve their fullest potential.

THE BATON OF BRILLIANCE: A LEGACY CONTINUES

Dr. Shrineela Kala
Director
NHSSA & NHPSP

The helm evolves, yet the legacy endures...

Our beloved Principal now ascends as Director, guiding the institution toward brighter and wider horizons..

Her visionary leadership remains the compass that will continue to steer NHSSA's journey toward ever-expanding possibilities...

With renewed vision and enduring wisdom, our institution steps into a new chapter of excellence.

As we warmly welcome our esteemed Principal, we remain deeply inspired by the guidance of our Director, whose leadership continues to illuminate our path.

Together, their synergy promises progress, purpose, and a future shaped by knowledge, values, and innovation.

Ms. Godhuly Chakraborty
Principal

PTAEC MEMBERS 2025-26

We sincerely acknowledge the invaluable contribution of our PTAEC members for the academic year 2025–26. Your active involvement, constructive feedback, and collaborative spirit strengthen the bond between school and home. Together, you help create a nurturing and supportive learning ecosystem for our students

Trailblazer

Dear Students, Parents, and Esteemed Readers,

It is with immense pride and pleasure that I present to you the latest edition of our school magazine, a reflection of the vibrant spirit, creativity, and accomplishments of our school community. This publication serves as a mirror to the dedication and talent of our students and staff, highlighting their efforts in academics, co-curricular activities, and beyond.

Education is not merely about acquiring knowledge; it is about fostering creativity, building character, and inspiring lifelong learning. At our school, we aim to nurture well-rounded individuals who are not only confident in their abilities but also empathetic and socially responsible. This magazine is a testament to those values, showcasing the stories, achievements, and voices that make our school truly unique.

I extend my heartfelt gratitude to the editorial team, teachers, and students whose hard work and enthusiasm have brought this magazine to life. I am confident that as you turn these pages, you will be inspired by the exceptional talent and dedication that define our school.

May this magazine serve as a reminder of the boundless potential within each of us. Let it motivate us to dream big, work diligently, and make a positive impact on the world around us.

Happy reading!

Warm regards,
Dr. Shrineela Kala
Director
NHSSA & NHPSP

Bridge Builder

At our school, our motto “Mission to Excel” is not just a line we live by—it is a guiding philosophy that shapes every initiative, every classroom interaction, and every student journey. We firmly believe that true education goes beyond textbooks, and therefore we strive for the holistic development of our students by giving equal importance to academics and co-curricular activities.

The academic year 2024–25 has been a year of remarkable achievements and proud moments for our school community. One such highlight was the outstanding performance of our students in the Aryabhata Ganit Challenge, where three of our students represented the school, and all three secured positions in the top hundred at the national level. This exceptional accomplishment reflects our students’ strong conceptual understanding, analytical skills, and passion for learning, and it fills us with immense pride.

Our Board Examination results for 2024–25 have been equally encouraging. Several Grade X students achieved a perfect 100 out of 100 in various subjects, and our Grade XII students also demonstrated academic excellence by securing 100 out of 100 in their respective subjects. These stellar results stand as a testimony to the dedication of our students, the tireless efforts of our teachers, and the school’s unwavering commitment to academic excellence.

Along with academic success, we continue to promote confidence, creativity, discipline, and leadership through a wide range of co-curricular activities, ensuring that our students are well-prepared to face future challenges with competence and character.

As Vice Principal, I extend my heartfelt appreciation to our students for their perseverance, to our teachers for their guidance and commitment, and to our parents for their constant support. Together, we move forward with renewed enthusiasm, staying true to our mission—Mission to Excel—and nurturing responsible, confident, and capable citizens of tomorrow.

Warm Regards
Ms. Ritu Jain
Vice Principal

Bridge Builder

"The great aim of education is not knowledge but action". This quote is given by Herbert Spencer, a 19th-century philosopher, emphasized practical learning, character formation, and scientific education.

We at New Horizon Scholars School, Airoli (NHSSA) believe and practice on similar lines. This year of compilation of magazine articles is a by product of all of above.

We at NHSSA comprise of a beautiful team of creative students, craftsmen teachers, culturally moral parents and capable leadership are bent towards complete cheerful and careful living.

Our magazine articles are a plethora of various colours of life. They are filled with emotions and values.

It gives us immense pleasure to come up with this magazine and showcase talent pool of our members at NHSSA.

We always strive towards our mission to excel in everything that we do. Our magazine is also culmination of excellence.

We are sure that everyone who reads it, will enjoy every piece and be inspired to write in future.

Let us always strive to be better individuals and make our world a better place to live, learn and laugh together.

We at NHSSA pray for great success and wish to galvanize all our stakeholders to create a special mark as citizens of BHARAT.

From the Editors

Being the editor of our school's e-magazine has been a wonderful learning experience. I learned that editing isn't just correcting mistakes—it's about understanding each writer's voice and helping their ideas shine. Working with different contributors taught me teamwork, patience, and responsibility. Seeing the final magazine come together is always the best part, and I'm proud to be a part of something that represents our school's creativity.

**Thank you
-Tanish Jadhav**

From the Editors

Putting this magazine together has been one of the most challenging yet rewarding experiences of my school year. Working alongside a dedicated team, I learned just how much effort goes into turning ideas into something real and meaningful. Every step taught us the importance of communication, patience, and creativity.

Designing this magazine wasn't just about choosing colors or arranging pages — it was about bringing many voices together and making sure each one was heard.

I'm grateful for everything this project taught me and for the support of the team I worked with. I hope you enjoy reading this magazine as much as we enjoyed creating it.

**Thank you
-Myra Vaz**

Innovation in Action - NHSSA Young Tech Trailblazers

At NHSSA, learning goes beyond textbooks - it transforms into creation, collaboration, and confident execution. Our Grade VIII innovators have showcased what happens when curiosity meets coding and imagination meets technology.

Harshvardhan Thukrul (VIII-C) introduced Bouncing Ball V1.0 — an engaging, unlimited-play mobile game designed with precision, teamwork, and perseverance.

Gandharv Vinayak Parab (VIII-C) developed an exciting Dual Gaming App featuring Moving Horse, a 30-second score challenge, and Truth or Dare, a family-friendly interactive game - blending logic with environment.

HALL OF FAME

Innovation in Action - NHSSA Young Tech Trailblazers

Arnav Nilesh Gavandi (VIII-D) built a comprehensive Drawing Academy App, offering course exploration, digital admission forms, and structured fee details — turning creativity into a seamless digital experience.

Viraj Tawade (VIII-D) designed Lorem Ipsum Pro, a professionally crafted Fitness App featuring premium UI design, smart registration, and secure authentication - reflecting technical finesse and modern aesthetics.

These projects are not just apps - they are milestones of vision, teamwork, problem-solving, and digital literacy. With the dedicated mentorship of our ICT educators and the unwavering support of the school leadership, our students continue to redefine what young minds can achieve.

Leader's Lounge

Head Girl

Head Boy

"When everything seems to be going against you, remember that the airplane takes off against the wind, not with it." — Henry Ford.

It has been an absolute privilege to serve as the Head Boy of this esteemed institution, New Horizon Scholars School Airoli.

Looking back, it wasn't the title or the duties that I valued most; it was the invaluable lessons that came with the role. In the long journey of life, it is easy to lose our direction and simply follow the crowd, even when that path doesn't lead to our desired destination. Often, we fear standing alone, so we strive to fit into spaces where others gather.

But true leadership requires the courage to be the center—to create a space where others feel inspired to follow. This journey was not always easy for me either. However, with confidence in heart and an analytical mind, respecting everyone and developing your skills no one can be a follower, but a leader themselves.

I have learned much during my tenure—a few to share, a lot to grasp more. My hope is that the leaders who follow will take these lessons to heart and continue to lead with passion for growth.

The Tribals

Tribal People are the original inhabitants of our country who live close to nature in forests, hills, and remote villages. They have their own customs, traditions, languages and way of life. Tribes like Gond, Santhal, Bhil, Toda and Khasi people believe that animals are part of their life and culture. Many tribes worship animals such as tigers, elephants, snakes, and peacocks as their protectors or symbols of strength.

In tribal paintings and stories, animals are shown as friends of humans. The Warli tribe of Maharashtra makes beautiful wall paintings showing animals, people and nature together. Tribal festivals include dances and songs that thank nature and animals for their help.

Tribal people use natural materials like feathers, shells and wood to make ornaments and tools. Their culture teaches everyone to live in harmony with nature and protect animals and forests.

CHAITRA P.

5 B

GOND PEOPLE

The Gond tribe is one of the largest and the oldest tribal communities in India, mainly found in Madhya Pradesh, Maharashtra, Chhattisgarh, and surrounding areas. The Gonds speak the Gondi language, which belongs to the Dravidian language family, but many also use Hindi, Marathi, or Telugu depending on where they live. Gond people generally live in simple houses made of mud and bamboo, often settled near forests and hills.

Gond tribals depend on farming, hunting, and collecting forest produce for their livelihood. Their art, music, and dance are vibrant, reflecting their close connection with nature. Important festivals and rituals are celebrated with music and dance by both men and women.

Today, Gond communities face challenges like poverty, loss of land, and lack of modern education. Many organizations are working to protect their culture and improve their living conditions. The Gonds are known for their bravery, rich traditions, and strong community spirit, making them a unique and valuable part of India's heritage.

When I Grow Up

I wake at six, eyes still half-closed,
Dreams of freedom suddenly dozed.
School bag heavy, heart feels light,
Yet I'm stuck in homework fights.

I stare at adults, calm and free,
Thinking, "Why can't that be me?"
No exams, no scolding stares,
No marksheet, no 'how-did-you-fare's.

But then I see - they rush to pay bills,
They hide their pain, they swallow pills.
They trade their time for a monthly pay,
And still wish for a childhood day.

Maybe growing up isn't a race to win,
Maybe the treasure's right here, within.
So I'll live my today, slow and true,
Because one day, I'll miss the view.....

* Monsoon Melodie *

Out of all the seasons,
I love monsoon for many reasons,
Lightning flashes Thunder roars,
Rain pours on the thirsty shores,
Filling the air with petricore,
A fragrance that we cannot ignore,
Peacock dances frogs sing,
Monsoon is a melodius thing!
Raindrops tapping the windowpane,
Children enjoying in the lane,
Puddles form, Streams flow, Rivers rise,
Lush green covers the nature beneath the skies,
Sunshine raindrop meets to form a rainbow,
We all enjoy watching the nature's magic show!

HER LOVE

SHE loved me.

I thought she could never.
With her eyes that always showed coldness,
and a brain never made for love,
but so witty and clever.

She LOVED me.

She said it through the flowers,
she bought me everyday.

Through all the nights, when the moon cried,
she said it, as she chose with me
to stay...

She loved ME.

How could she? I thought, love someone,
now so special, now so pretty.

A bit too annoying, a bit too picky.

But she showed me I was more than that,
loving me and showing care,

She made the world feel

though by a small measure,
a bit more fair.

THE QUEEN

Even if the castle crumbles

I will never give up

Cause I am the Queen of the 64 squares

I will crush down rather than bow

I won't stop fighting cause

I am the last hope for my kingdom

Even if I break down today

I will one day rise up again

And I will rebuild my kingdom again

But now I will have to fight

Cause the biggest loss is not losing

But is losing without trying

So I am the Queen of the 64 squares

And I will never ever give up

When life begins with Music

Once upon a time. There was a boy name Asher, his passion was to sing he like to sing every time while doing a work. He was studying in 8th standard. He was good in studies but, average in sports, he was smart but, have few friends. So, he used to sing alone. One day at school Asher was giving his audition of music to his music sir, sir was impressed by his singing and told him to in (Solo singing competition) Asher was very happy and excited, after he went home he asked his parents about what his sir told to him, he was shocked to listen that, his parents denied. He felt very sad and was disappointed. Now, he have to wait 1 year for another audition, he practice really hard till the next audition. Now, it was the day of audition, he sang and pass the selection his sir was proud of him and was very happy. After listening that Asher was very happy. Then he went home and decided not to tell this to his parents or else they will denied. Now It was the day of competition he sang and he got first position. After coming home he was feared that how will he tell to his parents he was shivering, he told every thing to his parents. Thought his parents were shocked. So, they decided to give him "Karoke". His thier son was shocked and excited, Many years passed he became a famous singer and his parents are also proud of him and after seeing this Asher is also happy.

The Invincible

The whole auditorium was filled with thunderous applause. Rohan climbed the stage with butterflies in his stomach. Who had ever thought a village boy afraid to utter anything in the college campus due to his inability to speak in English will win the Annual College Debate Competition.

Yes, two years ago Rohan got admission in city's most prestigious college. He was the topper in his village school. So, in spite of some financial problems his parents encouraged him to pursue his studies in the City College.

When he first stepped into the bustling city he was awestruck by its tall building and crowded roads. His awe turned into embarrassment when one day he was answering in the class in his broken English, someone mocked his accent and called him a 'grammar demolition machine'. The sting of his classmate's laughter was more scorching than the summer sun.

Determined to change, Rohan began a silent battle. He spent nights reading books under the dim table lamp in his hostel room, practise pronunciation and spoken English with Duolingo app in the mobile borrowed from his roommate. Listened to English music and watched English movies when he barely understood them. Months turned into years and slowly the language which was the cause of his misery became a source of joy when he was complimented by his classmates and teachers for speaking and writing in fluent English.

But the bullies in his class could not digest this. To make Rohan feel more embarrassed, they gave his name in the College Annual Debate Competition without Rohan's knowledge. Rohan accepted the challenge and prepared himself for the victory.

Now standing on the stage and holding winners trophy on award of his eloquent speech, he truly became INVINCIBLE.

Moral - Hardwork and self belief can turn ridicule to respect

The nature poem

The light comes shining into
your eye,
The land becomes dry,
The garland of a flowers
bloom,
The trees of a nature show
the way,
The sea start the waves,
and has some cats in a cave,
When we see the sight
from our eyes,
Everything is always bright.

The Ant

Down on the ground, a sight I did find,
Small creatures moving, a curious kind.
I leaned to watch, as they toiled with such a grace,
The tiny ants carrying food to their place.

Some were quite larger, others small to behold,
But together they worked, a story unfolds.
To their journeyed, with a sugar peice small,
I laughed at their efforts, anticipating a fall.

A pit lay ahead, a challenge so wide,
But they found another way, wide efforts applied.
I pondered how much they had stored, I confess,
My mind led me onward, their dwelling to assess.

I bid farewell as they moved by,
Beneath the vast and open sky.
From ants, a lesson I did gain,
Through wind and struggle, joy and pain

In hard times, we must never cease,
And fill our lives with inner peace.
For unity, a truth profound,
Together greatness can be found.

When pits appeared, they found a way,
Another path comes what may
Like ants with peices small yet grand
A pile of food by tiny hand

NEETI DUGGAR

Sleepless Night

The walls lean in, the hours slow,
A quiet ache begins to grow.
The nights is deep, but i lie bare,
My thoughts too loud for dreams to dare.
The moon light spills across the floor,
A ghost of calm I can't restore.
I chase the hush that never stays,
Lost in a maze of yesterdays.
Still, some where past the hollow ache,
A softer voice begins to wake.
Not sleep but something just as kind,
A moment's peace inside the mind.
- Neeti Duggar

The Recycling rap!

This is the time to wake up,
set an alarm to clean up,
set a routine to recycle,
to keep going the nature's cycle.

Take the step which is wise,
take care of the nature in precise,
the nature to us is a blessing,
so we better treat it like a prize.

Reuse - Reduce - Recycle,
instead of cars; ride a bicycle,
separate the wet and dry waste,
for the nature - that's the best!

Do all that you can,
to keep the nature clean,
I assure you that,
the great results will be seen!

- Veda Jadhav

MIND-BLOWING BRAIN FACTS

Our brain is the most amazing part of our body. It helps us think, learn, remember, and even dream!

1) The brain has about 86 billion neurons, which are tiny cells that send signals all the time.

**DO YOU
KNOW**

2) It uses around 20% of the body's total energy, even when we are resting.

3) Every time we learn something new, the brain creates a new connection between neurons.

4) The brain sends messages at a speed of almost 400 Kilometers per hour!

5) Smiling or thinking positive thoughts actually makes the brain feel happier. 😊

RIDDLES

I have a head, but never weep,
I have a bed, but never sleep.
I have a mouth, but never speak,
What am I?
Ans :- A River

I have a face and two hands,
But no arms or legs, I stand.
What am I?
Ans:- A clock

In the heart of darkness I shine,
A beacon in the night, without light
I guide those lost, through treacherous
Terrain,
Yet I'm not a star, nor a flame.
What am I?
Ans:- A Compass

I am a box, that holds keys with-
out locks,
Yet they can unlock your soul
What am I?
Ans:- A Piano

I am always coming, yet never arrive,
I have a name, yet no voice to drive.
I have a path, but no feet to roam,
I shape the future, yet remain unknown.
What am I?
Ans:- Tomorrow

Tomorrow

Topic - My learning adventure

My learning adventure Strong and true
Everyday I learn something new
From solving Math problems, to riding a bike
Competency helps me do everything right

Learning is not a very straight road
It twists and turns and you might get lost
But if you keep trying and trying with might
You will slowly build your skill right
But some decide to quit without a second thought
But everyone can choose skills on their own

Learning may not be easy to do
Like learning how to knit, sing or sew
That doesn't mean you shouldn't give it a try
Maybe you will like what you despised

We have come to the end of this poem
Remember to try new things and keep going
You can do it if you try very hard
I hope you have enjoyed and have a great day on

~Friendship~

In quiet times and stormy weather,
True friends always walk together.
Not bound by blood, but something more,
A cute bond that we never ignore.

They see your lovely soul behind your face,
And hold your hand in the darkest place.
They laugh with you when sky is bright,
And sit with you all the night.

Asmi Sonurkar

My Jar, my Jar,
What should I add in you,
all the thoughts in my mind,
Or maybe something new.
a little bit of kindness,
a little bit of love,
a little bit of happiness,
would actually work.
My Jar , my Jar,
What about, a little bit of sadness,
little bit of anger,
a little bit of worriedness,
will make a good combination.
My Jar, my Jar,
taking the bunch of emotions away,
you are the best Jar so,
hip hip hooray!

Pets Love

Love for Pets

Pets are great blessings in a person's life. They are the only ones who love us a lot but we as humans cannot understand it. In my story a dog saves a family of society from getting penniless at the time of covid-19. So let us begin

Story of 2019. In 2019 a terrible microorganism came in India from China, named corona virus. It got entirely spread in India. In fact, more than 10000000 people died in this covid-19. Not a single

person was coming out. As humans had a permanent shelter they were safe but animals were roaming here and there only for shelter and meal.

In this animals one dog was also there by finding shelter and food, he came to a society named Krishna society. Till 3 days' no one was seeing him they were just ignoring him, but as soon as he started living he was disturbing society, society members, watchman and secretary. They were now doubting the dog, as covid-19 was going

1

Manisha was their neighbor so she bought key of room number 1601. As soon as they entered the room the thieves had sprayed deep sleep medicine and were putting off the cash and gold to their bags. they called police and saved the family. the police came and caught the thieves.

After this incident all the society Members got inspired by the dog. The kids gave him a name as Alex. And society gave him a perfect a perfect and permanent place to live, also gave him proper treat of food, milk, meal, water medicine Etc.

In 2022 a vaccine was invented for this corona virus and all were now free from lockdown. Everyone were again at their job, school, college.

By-Parth Lodaya

Moral –Animals help us a lot but humans do not help them. Try to understand their feelings and take care.

THANK YOU

3

on he can be positive and negative too. So all society members decided to call municipality to take him away. Until they came the team of society kids made him hide. They knew that he was not positive as if any animal is having corona he/she dies within 8 hours but this dog was living in that particular society from 3 days that means 72 hours. When municipal corporation came they were unable to find the dog and left without taking dog. All society members were shocked, after they left the team of kids came out with dog to them and the leader of their team, So-ham said that 'We will not let you to remove this innocent dog from this society as he is negative'. One of the society member asked, 'oh! Child do you have any proof to say that he is negative'. So-ham replied, 'yes uncle I have PROOF And my proof is Rahul (another member of team of kids. Rahul elaborated everything that what is the reason behind its negativity

All the society members were to be turned mute in front of them. After that day they agreed of his stay but society members started bullying dog when the children were attending their online lectures, although kids were helping dog by providing him meal, milk and shelter.

Once a night the dog was tightly tied to his shelter and 3 thieves came into the society at 3:05 am, everyone in the society were sleeping except the dog he started barking loudly but no adult of the society came down to see what is happening in fact the kids came down to see what is happening. As soon as they came down the dog started to bark towards building wing B. so-ham decided to leave him from the belt as he was tied to his shelter. as they left him the dog started running towards wing B to its stairs to the 16th floor he lifted his legs up and directed to room number 1601, a girl named

Our Himalayan Adventure

In my May vacation, I had gone for a trek with a group called Trekkenure. I was very excited, and was looking forward to it. My cousin sister, my aunt, and uncle, and my friends Avani and Om and their parents were going along with me and my parents.

We left on the 5th of May, and flew over to Delhi Airport. We also got to see the newly built Terminal 3 at the Indira Gandhi International Airport. Then, we took a train to reach Pathankot, in Punjab. We reached early in the morning of 6th. After we reached, all of our fellow trekkers congregated outside the station, and then set off in the previously arranged mini-buses.

It was a very enjoyable, scenic ride, and we reached a town called Chamba in Himachal Pradesh in the afternoon and had lunch. Then, we reached our base camp at around 3 o'clock, and went on a trail to a nearby river.

The next day was the day of our acclimatisation trek, to get used to the environment, and temperature. We went on a long trail, and Chirag Sir, the one at the front leading the group, said that we had only covered one-third of the distance to the top-camp. After coming back and having dinner, Ajit Uncle and Bharati Aunty (the organisers) had a little surprise for us. They had set

up a telescope that we could observe the sky from! It was fun to see the moon through it.

The next day was the trek to the top camp. We started at around 9 am, and reached at about 3. The camp was like something straight out of a movie. It was at the foothills of some snow-capped mountains, hills on the sides, and a forest in the background. During the long trek, we had a companion - a dog named Scooby. She was in the front all the time, and when we stopped to let others catch up, she'd go up random trails, and but be back the moment we set off. The patches that seemed tricky to her us, she climbed within seconds.

The day after we reached the Top camp, we went to a nearby glacier. It was quite a short distance, but the route was slippery and steep. So, it took everyone nearly an hour to get there. But the effort was worth it. We had a lot of fun on it. We threw snowballs, slid down, and even built a snowman!

The next day, we went back down to the base camp. In the middle of it, we heard the news, "India Strikes Pakistan". In fact, we even heard missiles launch and the sound of distant explosions in the

when we were in Pathankot while coming. We experienced our first blackout at the Pathankot Railway Station. Even the trains that went by did not have their headlights switched on. The usually bright station lights were replaced by the dim red glows of the time indicator. Thankfully, we made it on the train and back to Delhi safely.

Then we headed home by flight. It was a very memorable trip, made even more so by the fact that at Pathankot, we were less than 50 kms to the Pakistan border. It is a trip that I will never forget, and I am already looking forward to the next one!

FACTS ABOUT BRAIN

- The brain feels no pain as it has no pain receptors which is why brain surgeries can be sometimes done while the patient is awake.
- You can train your brain. Neuroplasticity is the brain's amazing ability to change its structure and function in response to learning, experience or injury.
- You have about 8-6 billion neurons each connecting thousands of others.
- Your brain is the fattest organ in the body about 60% of the brain is made up of fat.
- Your brain uses energy than any other organ.

Silver Mirror / Tollen's test

The Silver Mirror Test also known as Tollen's Test is a qualitative chemical test that distinguishes between aldehydes and ketones. Aldehydes are easily oxidized by Diammine Silver Hydroxide, Tollen's reagent, to form Carboxylic acids. While the silver ions are reduced to metallic silver. It is a classic example of Redox reaction.

Materials Req.

For every 21g of Silver to be deposited, take :-

- * 85% (m/v) solution of AgNO_3 - 50ml.
- * 40ml of 35% (m/v) solution of KOH
- * 10ml of 85% (m/v) solution of NH_3
- * 75ml of 30% (m/v) solution of $(\text{CHOH})_4(\text{CH}_2\text{OH})\text{CHO}$ or $\text{C}_6\text{H}_{12}\text{O}_6$

Reaction & Procedure

- Take a test tube of silver nitrate solution and add potassium hydroxide. This will form insoluble brown globules of silver oxide.
- Now, add ammonia solution. This will dissolve the brown droplets as it reacts with silver oxide to form diammine silver hydroxide or the Tollen's reagent.
- Stirring and heating with a low flame, carefully add the glucose solution (aldehyde).
- You may also transfer the Tollen's reagent to a preferred container before adding glucose (aldehyde).
- Glucose reacts with Tollen's reagent and deposits silver on the inner surface, leaving a shiny mirror.

NORTH AMERICA

North America is a continent in the Northern and Western hemispheres. It is bordered by the Arctic Ocean to the North, the Atlantic Ocean to the east, and the Pacific Ocean to the South and West. South America is often considered a related continent as they are connected by the Isthmus of Panama.

GREENLAND

North America is the world's largest island. Its uniqueness lies in its vast ice sheet covering 83% of the land and its political status.

CLIMATE & WEATHER

It typically has short, cool summers and long, moderately cold winters. Greenland's climate is largely Arctic, with long, cold, and dark winters and short, cool summers when the sun never sets.

GREENLAND UNIQUENESS

- Rocky Mountains
- Appalachian Mountains
- Saint Elias Mountain
- Other notable Mountain etc.

RIVERS

- Mackenzie River
- Hudson River
- Fraser River etc.

DESERTS

- Okavango Desert
- Other desert-like areas etc.

ANIMAL AND PLANT

Animal - Some notable land mammals include polar bears, musk oxen, reindeer, etc. Arctic hare, Arctic hare, and Arctic wolf.

Plants - Broccoli, radishes, spinach, leeks, lettuce, turnips, chervil, potatoes, and parsley.

ROCKY MOUNTAIN

NATURAL WONDERS

- Niagara Falls
- Northern Lights
- Bay of Fundy
- Grand Bear River forest etc.

TRADITIONAL DRESS

Language: Greenlandic today is the official language.
Population: Approximately 55,000 people, very low population.
Traditional Dress: - The traditional Greenland National Dress.

CANADA

ABOUT
In: Ottawa
Language: - French
Minister: - Mark Carney

Mountain

- Rocky Mountains
- Appalachian Mountains
- Sierra Nevada etc.

River

- Mackenzie River
- Hudson River
- Fraser River
- Other notable Rivers

Deserts

- Okavango Desert
- Other desert-like areas etc.

Land Mark

- Saginaw Plateau
- Black Spruce
- Balsam Poplar
- American Ginseng
- American Larch
- Bitter root
- Other notable plants

Animals

- Bald Eagle
- American Bison
- Grizzly Bear
- American Alligator
- Monarch Butterfly etc.

Plants

- Maple tree
- Oak tree
- Pine tree etc.

Black spruce tree

Population: - Canada is the second largest country in the world, covering over half of the Northern Hemisphere.

Language: - Canada has two official languages: English and French. English is the most commonly spoken language in most provinces and territories.

Traditional: - Canada doesn't have a single "national dress" like some countries do. Instead, traditional clothing styles like Carleton jackets, Ojibwa shirts, mittens, and beaver hats, etc.

UNITED STATES OF AMERICA

ABOUT

Capital: - Washington, D.C.
President: - Donald Trump

Traditional Dress:

Native American dress includes ceremonial head-dresses, buckskin garments, and beadwork, as well as items like cowboy hats, denim jeans, and flannel shirts.

Population: - The United States is the third most populous country in the world.

Language: - English is the most common language spoken in U.S. homes, with approximately 225 million speakers, as well as numerous bilingual speakers. Spanish is spoken by approximately 40 million people.

North America has diverse climates, including humid continental in the north and humid temperate in the south, and maritime climates on the coasts. The west coast features a Mediterranean climate, while the interior has a continental and arid climate. The southeast is hot and humid, influenced by the Gulf of Mexico, and the mountainous regions have unique high-altitude climates.

Greenland has a polar climate with long, cold winters and short, cool summers, though weather can be unpredictable. Coastal areas are milder due to the Gulf Stream, while the interior ice sheet is permanently below freezing. Winter temperatures can range from about -7°C (negative 7 degrees cap C)

-7°C

in the south to -34°C (negative 34 degrees cap C)

-34°C

in the north, and summer temperatures average in the mid-40s $^{\circ}\text{F}$ (around 7°C (7 degrees cap C)

7°C

) along the southwestern coast, dropping to around 4°C (4 degrees cap C)

4°C

in the far north.

Canada has a varied climate due to its size, with generally cold winters and short summers in the north, and hot, humid summers and cold, snowy winters in the south. The west coast is temperate and rainy, while the interior prairies experience very cold winters and hot summers. The Arctic region is extremely cold with below-freezing temperatures for most of the year.

The USA's climate is diverse, ranging from the hot, humid summers of the Southeast to the cold, snowy winters of the North and the arid deserts of the Southwest. Its climate is shaped by factors like latitude, elevation, and proximity to water, with different regions experiencing distinct seasonal patterns. The Rocky Mountains also act as a significant divider for weather systems.

When you draw a mandala
your mind will be calm and balanced,
you feel energetic and enthusiastic.
Drawing Mandala is a mediation
where the soul speaks in circles and silence.
Repetitive patterns of mandala
engage both the hemisphere of the brain
and make you more active.
Placing a mandala on your wall
can bring positive energy into your home.*

✨ Where We Belong ✨

Within NHSSA, our dreams take flight,
With lessons learned from dawn to light.
More than books, more than rule,
NHSSA is our home—our happy school.

Teachers here guide with hearts so true,
In every step, they believe in you.
They smile the widest when results appear,
Sharing our joy, our hope, our cheer.

Respect and care in all we do,
At NHSSA, bonds are strong and true.
Through laughs and tears, we learn, we grow,
With hands that help and hearts that glow.

Proud we stand, voices strong,
NHSSA is where we belong.
Forever grateful, hearts so full,
To be a part of NHSSA—so wonderful. 🌈

छोट फुल

एक छोट फुल
आमच्या संसाराच्या
अंगाणी फुल
त्या फुलाच्या
सुगंधाने संसार
स्वप्नी वीरट

त्या फुलाच्या फुल्याने
अनेक बदल झाले
ते बदल मात्र हवे हवेसे वारले
कधी ते हसले कधी ते रडले

त्याच्या हसण्यात आणि
रडण्यात आयुष्य दखून गेले
त्या सहवासात जगाचा विसरले
त्याच्या येण्याने मन परत
बालपणात गेले.

त्याचे झुले झुले
हात, पाय आणि नाजूक
शरीर पाहताच वाटे
ते हसले की हसावे
ते रडले की रडावे

आमच्या या आयुष्यातल्या
फुलाचा खुप फुलवायच आहे
त्याचा फुलपाखरासारखे
उडायच आहे.

चार चौघे

चार मित्रांची झरली होती सखा
नाम होता महोमध्य उखा
सर्वनाम, विशेषण, क्रियापद असती सोबत सदाकदा

नाम नाम म्हणाला नाम म्हणाला
सांगा पाहू जगात नामा शिवाय आहे तरी काय?
कस्तूच्या व्यक्ती प्राण्यांच्या नावाला नाम असे म्हणतात.
चार मित्रांची झरली होती सखा
नामाच्या जागेवर **सर्वनाम** उखा

सर्वनाम नामाने आपली जागा दिली सर्वनामाला
सर्वनाम म्हणाला सर्वनाम म्हणाला
नामाच्या ऐवजी मी येतो मला सर्वनाम म्हणतात.
चार मित्रांची झरली होती सखा
विशेषण होता नामासवे उखा.

विशेषण विशेषण म्हणाला विशेषण म्हणाला
नामाची मी म्हणती गालो मीच त्याची विशेषमाहिती सांगतो
मला विशेषण म्हणतात.
चार मित्रांची झरली होती सखा
क्रियापद होता या अवसिरे उखा

क्रियापद क्रियापद म्हणाले क्रियापद म्हणाले
वाक्यात नेहमीच मी आहे शेवटी
पण माझे महत्त्व ह्या कमी नाही
माझ्या शिवाय वाक्याचा अर्थ पूर्ण होतच नाही.
आपण त्यांना गुफले एका मागेमागे
वाक्य तयार झाली सुंदर छान छान ।

आई

सुखात हसते दुःखात हसते
आई तिचे नाव असते.

कधी संकट आले तर पाठीशी
उभी राहणारी तीच असते.

आठवड्याचे सगळे वार
काम करत राहते फार

कधीच करत नाही तक्रार
शिविवास्वी सकाळ असो वा दुपार

जेव्हा लेकरू आजारी पडले
तेव्हा तिची तर झोपच उडते.

पती असो वा लेकरू असो
सगळ्यांच्या चुका पोटात घेते.

अशी ही आपली माय
कधीच कुणा कळली नाथ

कधीच कुणा कळली नाथ !!!

Mind Matters

Beyond Marks: The Heart of a School Counselor

By Sakshi Patil, School Counsellor

In every classroom, there are stories that never get written on the blackboard.

A child who laughs loudly but cries silently at night.

A topper who fears losing their rank more than losing sleep.

A quiet student who wants to speak... but doesn't know how.

As a school counsellor, I don't just work with "problems."

I work with emotions, dreams, fears, friendships, self-doubt, courage and sometimes, even broken crayons and broken hearts.

* School is Not Just About Marks

We often celebrate report cards. But what about:

- The child who controlled their anger for the first time?
- The student who raised their hand despite anxiety?
- The teenager who chose kindness over bullying?
- The child who said, "Ma'am, today I felt proud of myself."

These are victories too.

In a world that constantly asks, "How much did you score?", I ask,

"How are you feeling?"

✿ What Really Happens in the Counselling Room?

No, it's not a "punishment room."

It's not a "complaint office."

And definitely not a "madam will scold you" place.

It is a safe space.

A place where:

- Tears are allowed.
- Confusion is normal.
- Mistakes are human.
- And feelings are never "wrong."

Sometimes we draw.

Sometimes we play games.

Sometimes we talk about superheroes.

Sometimes we talk about heartbreak.

And sometimes... we just sit in silence — because healing doesn't always need noise

✿ To the Students Reading This...

You are more than:

- Your marks
- Your mistakes
- Your comparisons
- Your failures

You are:

- A work in progress
- A bundle of potential
- A growing mind
- A brave heart learning every day

It's okay to:

- Not understand everything.
- Feel anxious before exams.
- Get angry sometimes.
- Ask for help.

Asking for help is not weakness.

It is emotional strength.

✿ To Teachers Reading this...

Behind every "disruptive behaviour" is a message.

Behind every incomplete notebook is a story.

Behind every child who doesn't listen... is a child who wants to be understood.

When we work together — teachers, parents, counsellors — we don't just teach subjects.

We shape futures.

Mind Matters

To the Parents...

Your child doesn't need a perfect parent.
They need a present one.

Listen more.
Compare less.
Encourage effort.
Celebrate growth.

Your belief becomes their confidence.

Let's Build Emotionally Strong Schools

Imagine a school where:

- Mental health is discussed as openly as mathematics.
- Emotional intelligence is valued as much as English grammar.
- Kindness is graded higher than competition.
- Every child feels seen.

That is not just a dream.
That is the direction we are moving toward.

Final Thought

A school counsellor is not someone who "fixes" children.

Children are not broken.

We simply help them:

- Understand themselves,
- Manage their emotions,
- Build resilience,
- And believe in who they are becoming.

Because at the end of the day...

Education is not just about making a living.
It is about building a life.

And every child deserves a life filled with confidence, courage, and compassion.

SCHOOL COUNSELLOR

Talk Of Triumph

Success in academics, for me, has always been about consistency, focus, and managing time effectively. I learned early on that planning my day makes a big difference. By creating a simple schedule and prioritizing important tasks, I was able to balance studies with other activities without feeling overwhelmed. Instead of studying everything at once, I focused on completing small goals every day, which helped me stay organized and confident.

Another strategy that worked well for me was focusing on understanding concepts rather than just memorizing them. I tried to study actively by revising regularly, making short notes, and testing myself on what I had learned. This not only improved my retention but also made studying more interesting and effective. Staying disciplined and avoiding distractions during study time also played an important role.

My advice to fellow students is to stay consistent and believe in your abilities. Success does not come from last-minute efforts but from small, regular steps taken every day. Managing your time well, staying focused on your goals, and maintaining a balanced routine with proper rest can help you achieve your best.

Yaadein...

School days were one of the best days of my life. Those beautiful memories will always remain evergreen in my mind.

“Vo din bhi Kya din the....” is one line sung by Arijit Singh which always comes to my mind, whenever I recollect my school days. The reason I used to come to school by sacrificing my sleep was not only to learn but majorly to spend time with my friends.

I still remember us roaming the corridors for no reason every morning before the assembly, suppressing my happiness when the bell rang during a boring history lecture so that sir does not come to know, whispering and gossiping in between lectures, not waiting for the 10:30 break and secretly finishing half of my tiffin in between lectures. Whenever we had a proxy lecture, we made sure that the teacher coming in class would be a PE teacher or at least would take us to PE. The exam times were the most stressful.. Making sure to not skip any chapter, those late night study sessions, calling my friends just to ask how much of the portion they completed. The morning of the exam, teaching each other the chapters. Doubting if my answers are correct during the exam and then feeling relieved when the answers are correct after discussion with my friends, but also regretting to not listening to my gut when in some part of my mind I knew the correct answer but still ended up writing the wrong one. We also used to think of creative but valid reason to tell our teachers if we forgot to do our homework. Looking out the window for some entertainment in between of a boring chapter. We always used to eagerly wait for 2 things 1. Holidays and 2.celebrations like garba when we could dress up to our hearts content and just click photos with our teachers and then go to play garba with our friends for almost an hour. Going down this memory lane, I realise that time flew so quickly. I miss the bell ringing, the morning assemblies, doodling in the page margins, and giggling at our inside jokes in the middle of lessons. I wish to be a part of this again.

~Alicia.Q

Yaadein...

School memories are some of the most precious moments of life. Rushing to the classroom just as the bell rings after the break, hoping the teacher hasn't entered yet, was a daily adventure. Sometimes, finishing homework in the last few minutes before the lecture began felt like a life-threatening mission. And when the teacher asked for homework, the classic excuses would instantly appear- Mam, notebook ghar pe reh gayi, or Mam kal light nahi thi isliye homework nahi ho paya.

A free lecture from the teacher felt like the greatest blessing ever. The happiness on hearing - Aaj free period hai was simply unmatched. Convincing the teacher for that extra half mark — Mam bas half mark aur de dijiye na, mera percentage badh jayega was another small but memorable struggle. The nervousness before an exam and that one friend who instantly says, Arre tension mat le, sab aata hai, somehow made everything feel better.

School was also about sharing tiffins, laughing during the class, and secretly whispering with friends while pretending to pay attention. And of course, going to the canteen felt extra special on days when we forgot to bring our tiffin.

My journey from Nursery to 10th grade has been truly wonderful. It has been filled with caring teachers, unforgettable friendships, countless laughs, and little moments that have now turned into beautiful yaadein that I will always cherish.

Muskan H.

I USED TO BE SAD AS I HAD VERY LESS FRIENDS. BUT MY DEAR TEACHERS NEVER MADE ME FEEL UNHAPPY. LITERALLY, TEACHERS ARE MY BEST FRIENDS FOREVER. IN CLASS 9-10, I GOT A BFF THAT WAS BEST THING HAPPENED IN ALL THE STRESS OF BOARDS, YOU KNOW GOD'S PLAN. I WAS LOST, STILL WORKED HARD AND GIVEN MY BOARD EXAMS. YOU WON'T BELIEVE I DIDN'T EVEN SOLVE ANY SAMPLE PAPERS OR PYQ FOR CLASS 10. I GOT 85% IN BOARDS (BEST OF 5). YOU KNOW, TALENT CAN FAIL BUT HARD WORK AND SMART WORK ALWAYS WIN. I WAS CAPABLE BUT I DID NOT PARTICIPATE IN ANY ACTIVITIES IN SCHOOL, AND STILL MY MIND KEEPS REMEMBERING IT. AND THEN COMES THE FAREWELL, WHICH WAS THE LAST DAY I WENT TO SCHOOL. THIS DAY DIDN'T EVEN FEEL AS THE LAST DAY. BUT AS THE TIME PASSED I STARTED REALISING IT'S ALL OVER.

WHEN I AM IN COLLEGE RIGHT NOW, I MISS EVERYTHING ABOUT SCHOOL, ALL THOSE CLASSROOMS, CORRIDORS, TEACHERS ETC. NOW, I KEEP CONTACT WITH MY TEACHERS AS I MISS THEM THE MOST.

ONE FINAL THING, IF YOU ARE A CURRENT STUDENT AND CAME TILL HERE THEN CONGRATULATIONS, YOU HAVE PATIENCE AND THAT MAKES YOU SPECIAL IN THIS CURRENT WORLD. ALWAYS REMEMBER IF ALL DOORS ARE CLOSED AND YOU ARE IN THE DARK, ONE DOOR OF LIGHT WILL OPEN FOR SURE.

I WOULD LIKE TO CONCLUDE WITH ONE OF MY FAVOURITE QUOTES, "SOME PEOPLE DREAM FOR SUCCESS, AND SOME PEOPLE WORK HARD FOR IT".

ALWAYS LIVE IN THE PRESENT, FORGET THE PAST AND CHEER FOR THE AMAZING FUTURE YOU HAVE. I AM DAMN SURE YOU WILL BE GREAT.

**KEEP GOING !
NEVER GIVE UP !!**

MISSING YOU SO MUCH NHSS !

LOTS OF LOVE TO ALL MY RESPECTED TEACHERS AND ENTIRE ENTHUSIASTIC NHSS TEAM, THANK YOU FOR GIVING ME THIS OPPORTUNITY TO SHARE MY STORY TO MY WORLD.

THOSE WERE THE DIAMOND DAYS

**SIGNING OFF,
ARUSH AHERKAR
(NHSS 2022-2023)**

Lake

As still as a mirror
For the sun and the sky
The abode of freshwater
For the droughty passers-by

Placid and peaceful and
Shimmering aqua of mine
Hushing and soothing and
Reflecting the sunshine

With small tender waves
Caressing the rocky fringe
The nature herself spellbound
Seeing my turquoise tinge

Under my exquisite surface
Is the vibrant city of fish
Along with the quacking ducks
And seldom a snake's swish

Amidst the thriving forest
Adding beauty to the hills
Some rivulet springing off me
I'm tickled by wind's chills

Brimming in the downpours
In the summers my waters flake
I'm incarnation of nature's beauty
I'm a vast splendid pool, or simply a LAKE

-Arghya Deogaonkar

Voice of Support

School is not merely a building but a container full of beautiful experiences, some happy and some not so happy. My daughter, Chetanshi, has been a part of the NHSSA family since her 1st grade. Throughout her school years everyone, from teachers to didis, has made her journey meaningful.

Thanks to her teachers' dedication and hardwork all her concepts are crystal clear ! They not only taught her the syllabus but also life skills. They gave her several opportunities to shine which she would never forget.

In a nutshell, NHSSA has been a major part of my daughter's happy memories which she'll be missing henceforth.

So thank you NHSSA for making her school days unforgettable !
